01:11:26 jorge gibert: The research articles in 1967, the first collection of the scientific information institute (ISI), was 106 papers. In 1990 it was 1400, but in 2020 it was 22.000 papers, and it seems to me that the corrected neoliberalism of the democratic governments

were responsible for this increase and this change in quality, from technical high school to university, at least in some cases.
