

# China's Young Talents Programs.

## How do returnees perform?

### 3 June 2021

00:18:16 Giulio Marini: <https://doi.org/10.1093/scipol/scab021>

00:18:37 Giulio Marini: this is the DOI of the open access publication we are presenting today

00:44:32 Simon Marginson: your questions please! We have no one yet on the Q&A list

00:45:59 Akiyoshi Yonezawa: Thank you for very excellent analysis!! I think Chinese academic communities are very active in launching international journals from China. Do you think this phenomena pose impact son the result of your data analysis?

00:48:38 Soyoung Lee: If your future research focuses on individual researchers, which aspect would you compare? For instance, would motivation/feeling of autonomy give helpful implications by any chance - researchers in the scheme might feel less autonomous if their future is already decided (returning back)?

00:49:26 Trif Victorița: Congratulations!

00:56:19 Trif Victorița: I am interested in some details about type of publications.

01:04:14 Soyoung Lee: Haha I was thinking the same thing! Where's Hongwei?

01:08:45 Zachery Spire: Can I ask a question on this?

01:08:48 David Mills: Can I ask if it is a subgroup of Y100T with the lower quality publications? Can one have high and low quality pubs?

01:09:38 CGHE Webinars: Thank you for joining us today. A recording of this session will be on the CGHE site tomorrow: <https://www.researchcghe.org/events/cghe-seminar/chinas-young-talents-programs-how-do-returnees-perform/>

01:10:14 CGHE Webinars: Our next webinar will be on Tuesday, 'European Higher Education systems under austerity, addressing the pressures of equity promotion and capacity for high-skill formation policies: the cases of Portugal and the Netherlands'. You can register here: <https://www.researchcghe.org/events/cghe-seminar/european-higher-education-systems-under-austerity-addressing-the-pressure-of-equity-promotion-and-capacity-for-high-skill-formation-policies-the-cases-of-portugal-and-the-netherlands/>

01:12:33 Lili Yang: Thank you David for the question. I think on the individual level, what you described is often the case – individual researchers often have both high-quality and less high-quality publications. For example, for returnees, in their application, both quantity of

publications and representative publications (those with high quality and in top journals) are emphasised and considered.

01:18:51 Qi Wang: Thank you for your interesting and important research, Lili and Giulio!

01:18:53 Zachery Spire: Many thanks colleagues
